Share your dreams with us, and let us translate them into the language of the vineyards.

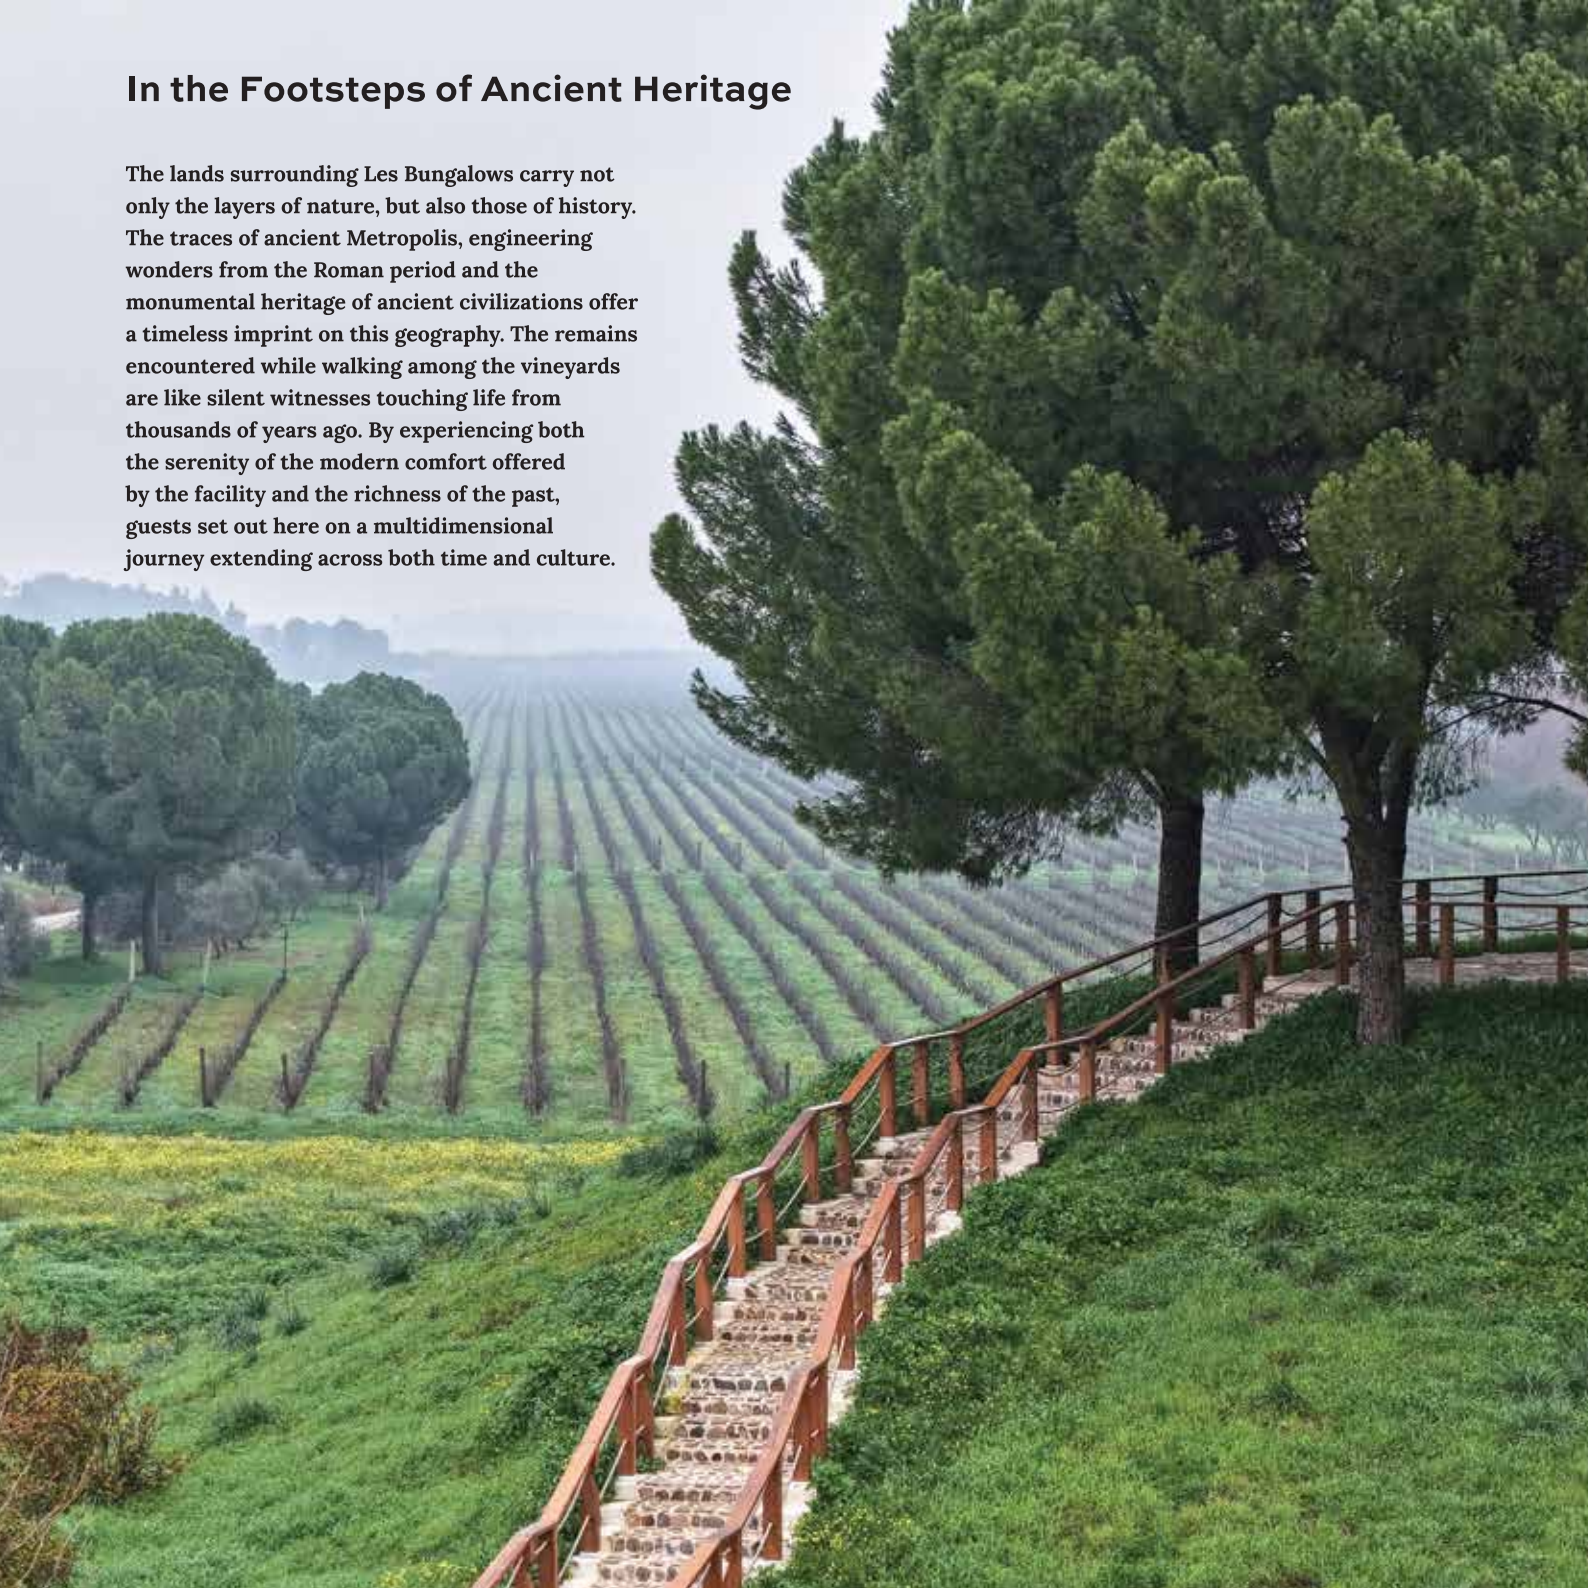

A scenic landscape featuring a winding, light-colored path that meanders through a lush green vineyard. The vineyard is filled with rows of grapevines, some of which are covered in dense, dark green foliage. In the background, there are rolling hills and mountains, with a few scattered trees and a small building visible on the left. The sky is a soft, hazy blue, suggesting a calm, early morning or late afternoon setting. The overall atmosphere is peaceful and serene.

Awaken to the Sound of Nature

Walking paths stretching through the vineyards offer guests a different feast of colors and scents in every season. These discovery walks, accompanied by the serene rhythm of nature, refresh both the body and the mind. The changing light and scenery at different hours of the day offer guests a new experience with every step.

In the Footsteps of Ancient Heritage

The lands surrounding Les Bungalows carry not only the layers of nature, but also those of history. The traces of ancient Metropolis, engineering wonders from the Roman period and the monumental heritage of ancient civilizations offer a timeless imprint on this geography. The remains encountered while walking among the vineyards are like silent witnesses touching life from thousands of years ago. By experiencing both the serenity of the modern comfort offered by the facility and the richness of the past, guests set out here on a multidimensional journey extending across both time and culture.

Tumulus Hills

The registered tumulus hills located within the Lucien Arkas Vineyards estate carry the traces of monumental heritage reaching from Antiquity to the present day. These structures, left behind by the Lydian and Persian civilizations, reflect the millennia-old continuity and cultural richness of the Küçük Menderes Valley. The remains that can still be observed today keep the historical depth of the region alive.

Aqueducts

Aqueducts from the Roman Period are among the most magnificent examples of ancient engineering. Carrying water from the slopes of Bademgediği Hill, located approximately 7 kilometers from the ancient city of Metropolis, these structures can still be seen on the grounds of the vineyard today. Together with the details of the preserved castellum aquae (water distribution structure), they allow visitors to feel the technical knowledge and aesthetic understanding of the past.

Griffin

One of the powerful mythological figures of antiquity, the Griffin, as a creature with the body of a lion and the head and wings of an eagle, symbolizes the sanctity of viticulture and production. The protective acceptance of Dionysus' wine bowl points to the ritual dimension of the symbol and the sacredness of the vineyards. Also seen in the mosaics of the ancient city of Metropolis, the Griffin carries the powerful trace of the historical heritage of viticulture culture to the present day. For us, the Griffin is not only a symbol from the past, but also a present-day expression of the will to protect the land, production and history.
